STATINTL

MEMORANDUM FOR: Executive Officer  
Office of Medical Services

SUBJECT : [REDACTED] retention of, as action  
indicator for Office of Medical  
Services

REFERENCES : A. Memorandum for Executive Officer,  
DDA, et al., from EA/DDO dated  
10 April 1975

B. [REDACTED]

1. As requested by Reference A (relayed by SSA-DDA to D/OMS), it is recommended that Subject indicator be retained as the cable action indicator on traffic which necessarily conveys specific medical information about particular individuals. When used in combination with the sensitivity indicator, i.e., RYBAT [REDACTED] such messages, whether incoming or outgoing, will contain personal and private medical information about individuals. For reasons of personal privacy and medical ethics, the distribution of such traffic needs to be severely restricted--where possible--to Agency medical personnel exclusively. At Headquarters, the distribution should continue to be to OMS only, with the exception of one copy to the office of the A-DDO. In the field, the distribution should only be to Agency medical personnel present. At stations and bases where no medical personnel are present, distribution should continue to be limited to the Chief of Station or Base.

2. In order to minimize distribution of RYBAT [REDACTED] traffic, it is important to continue to delegate releasing authority to certain medical officers within OMS at Headquarters, and to Agency medical officers in the field.

3. Where such traffic has to be released by other than Agency medical officers, it should carry the indicators RYBAT MEDIC, plus the explicit distribution

STATINTL

instructions to addressees: "EYES ONLY D/OMS or COS/COB"  
as appropriate.

4. Since such traffic will by-pass all the normal command and administrative channels, it is essential that it either contain no command/administrative matters, or that all such matters be simultaneously conveyed by parallel traffic through appropriate non-medical channels.

STATINTL

5. Worldwide, dozens of RYBAT [REDACTED] messages are released daily.

6. Both in the field and at Headquarters, appropriate command officers are promptly informed by the medical officers concerned of all cases of significant medical problems surfacing exclusively through the RYBAT [REDACTED] channel

[REDACTED] STATINTL

Chief, Field Support Staff, OMS

MEMORANDUM FOR: Executive Officer, DDA  
Chief, Executive Staff, DDI  
Executive Assistant, DDS&T

SUBJECT: Updating of Special Cable Indicators

25X1A

[REDACTED] which were last issued in April 1967 and April 1968 respectively, and which pertain to cable communications, are in the process of being updated. Attached are the portions of each which concern Special Indicators. I suspect that some of these Special Indicators may no longer be necessary, or can be changed from action to information indicators. Would you please review those belonging to your Directorate and inform me in each case whether the Indicator should be retained as is, should be canceled, or should be changed from action to information status. For those which you wish retained, I would appreciate a brief description of use including such details as frequency of use, sensitivity factors, nature of traffic, and any other reasons why special releasing procedures are necessary.

25X1A

Requests for retention will be submitted to the DDO for revalidation prior to reissuance of [REDACTED] and [REDACTED]. Please call me [REDACTED] should you have any questions.
